

VLU-02 (voice listen unit)

- All GSM SIM card compatible
- Microphone range(Meter): 5~7(Radius)
- Stand-by time: ~4 days
- Working time: 4 hours

You only need to buy a new SIM card, place it in this device. Once you call this number this device will auto answer, and it is working like a phone with auto answer without speaker

So you can actually hear anyone's talking about you or whatever when you call in that sim card's phone. But no one will notice because this device look like a USB hub or small USB device. But actually it is a spy tool and can also be used as a Baby phone
